

MyPerformance2019 - Claus Hoerandner

Overall Achievement and Impact

Note: You can access the overall comments recorded in GPMS through this link: [click here](#). Please review and paste all content you want to keep into the comment box below. For more support on how to do this, please explore this [learning aid](#).

While achieving goals is an essential part of delivering, overall performance is more holistic. Take this opportunity to highlight key professional achievements and accomplishments throughout the year. Consider the impact on the business (your results) and how you delivered (behaviors).

Record your Q2/Q3 conversations to refer back to and support a meaningful conversation at Year-End.

Employee's overall comments

Overall, I believe 2019 was a successful year. I was able to smoothly make the transition to the new SAP system and being able leverage some of the capabilities the new environment offers. I also made some advancements in the visualization space and will continue to drive this forward in the new year. In the IFRS17 space I was able to convey the basics of the new accounting standard to our team as an ambassador and prove our team's readiness for the Insightz submission and internal management reporting. I am also leveraging our reporting expertise in the P&C space to enhance and simplify Life reporting. I am continuously trying to improve my leadership skills by participating in organizing the FAR Quarterly meeting, attending the Global Leadership summit, and as a presenter at the Innovation Expo and Innovation Video. My next challenge will be to learn to lead people and able to manage the workload among various colleagues instead of doing the work myself. In addition, next year I will have to get the IFRS17 management reporting up and running and respond to the changes that will inevitably occur. I am looking forward to tackling these challenges in 2020.

Manager's overall comments

Claus had a fantastic year in 2019. He continuously went above and beyond as we navigated through a ton of ambiguity, not only in our team, but as an organization, which allowed us to be successful in our deliverables. In addition to all the value he brought during the normal course of business activities, he also got involved in many more areas. He participated in the FLS - Innovation Expo for FAR and did a great job highlighting some of our team's initial wins with the new S4 system. He also leads up efforts for FAR Workplace and helps with the FAR townhall. Claus also took a lead role as an IFRS 17 ambassador and has been quickly learning what IFRS 17 means to the organization, what it means for FAR and for IR. He is true team player and continues to be valued member of IR and FAR. I look forward to Claus continuing to grow and develop as we head into 2020.

Performance Goals

Please reflect on the achievements for each goal. Provide an assessment for each goal, as well as comments and rationale to support how you've evaluated each individual goal. Consider both **what** as well as [how](#) results were achieved.

Assess against the three performance categories – partially met, fully met and exceeded.

Others

Objective 3: Operational Excellence/Projects

- 1) Canada Clearing House
- a) Develop solution by Q2

b) Reporting solution by Q4

2) SAP Transformation

- a) Learn new system capabilities by Q1
- b) Ensure reports are correctly pulling data by Q1
- c) Create proper control reports by Q1
- d) Assist others - continuously

3) Uploading Plan and Prior Year Data into S4/Hana

- a) Uploaded in time for first reporting cycle
- b) Uploaded in time for first reporting cycle

4) Implementation 2019 BU & LE Structure across all various systems and reports

- a) Implemented in time for first reporting cycle
- b) Implemented in time for first reporting cycle

5) IFRS 17

- a) Create new Management Reports that account for the IFRS 17 changes by Q2
- b) Perform Dry-Run testing for IFRS 17 by Q3

6) Testing for various Home Office/Local Projects

- a) Complete testing with appropriate sign-offs

7) Complete 1 or more automation projects and put into production within 3 months of starting each project

Cheryl Makowski's Comments

Claus always operates to create value and efficiencies with his reporting and analysis, as well as by sharing his findings across the organization. He has excelled in his understanding of the new S4 Hana system and is always willing to help out the larger F&A team. I truly appreciate the way in which Claus takes on issues and works to not only identify the issue, he also works with respective teams to ensure proper corrections and controls are put in place to avoid repeat errors.

While our team was well prepared for go-live of s4 Hana, there were many things we still needed to accomplish early on and Claus did a fantastic job navigating through these issues and ensuring our success at go-live. He was instrumental to the early closes of the year, not only by quickly working to "code" our reporting for the new Expense allocation process, he also partnered with the Close Ops team to raise issues, work through resolutions, and build tools that would allow for measures and controls ensuring issues do not repeat themselves. For this, he played a key role in identifying/solving expense allocation issues. Claus also identified an efficient reporting solution for our P&C report card which allows us to be less dependent on IT. In addition, Claus has incorporated Legal Entity and RU's in the report card which is helpful for the consolidated MD&A and statutory analysis. He also incorporate new reporting based on Canada's new structure.

In addition, he has brought tremendous value to our team and ZNA for his work on IFRS 17. He quickly learned what IFRS 17 means to the organization, what it means for FAR and for IR. He led numerous training sessions, built mock P&Ls for 2020 light parallel, worked with BPC team to land a common set of accounts, and assisted with the IFRS 17 InsightZ dry run and tie out to FIP. His efforts have made our team well prepared for IFRS 17.

Claus Hoerandner's Comments

1) I was not involved with Clearing house in 2019 but will help if needed from a technical/reporting standpoint next year.

2) We are taking advantage of the new SAP reporting solution. I even took the IT proposed reporting solution a step further and enhanced our reporting capabilities. All our reporting uses my developed solutions rather than IT's solution. I was able to further develop our reporting tools to allow us to drill into companies on the report card. I also built in cross checks and

have been training many folks on how to use the new tools.

3) Plan and Prior year were successfully loaded and tied out. Prior year even included market basket and 40 LOB level information. Took this process over from Tim Amsistlavsky.

4) Structure has been fully implemented by the first reporting cycle without issues.

5) I'm an IFRS17 ambassador and actively trying to understand the new reporting requirements by mocking up new reporting requirements. I also assisted with the submission of IFRS 17 Insightz, discovering allocations issues with the repost program, and developing our internal report card for the next reporting cycle.

6) All testing completed successfully.

7) All our robotic processes have been changed to work with the new SAP environment. These processes are now running in production.

Goal Details

Goal Name	Objective 3: Operational Excellence/Projects	Weight	40.0%
Description	1) Canada Clearing House a) Develop an automated solution b) Meet management reporting needs		
	2) SAP Transformation a) Learn new system capabilities b) Ensure reports are correctly pulling data c) Create proper control reports d) Assist others		1) I was not involved with Clearing house in H1 yet but will help if needed from a technical/reporting standpoint.
	3) Uploading Plan and Prior Year Data into S4/Hana a) Upload and balance prior year P&L results by the 40ish LOB and direct expense b) Upload and balance 2019 Plan for various reports (Agents Balance; DAC; New Business; Commissions; Premium Tax, etc)		2) We are taking advantage of the new SAP reporting solution. I even took the IT proposed reporting solution a step further and enhanced our reporting capabilities. All our reporting uses my developed solutions rather than IT's solution. In addition, I built in cross checks and have been training many folks on how to use the new tools
	4) Implementation 2019 BU & LE Structure across all various systems and reports a) Change all reporting to account for the 2019 S4 Hana System conversion b) Implement structural changes in all systems (InsightZ, SAP, HANA, Excel, BOE, FIP)	Feedback Conversations (Q2 & Q3) - Employee's Comments	3) Plan and Prior year were successfully loaded and tied out. Prior year even included market basket and 40 LOB level information. Took this process over from Tim Amsistlavsky.
	5) IFRS 17 a) Create new Management Reports that account for the IFRS 17 changes b) Perform Dry-Run testing for IFRS 17 6) Testing for various Home Office/Local Projects a) As needed		4) Structure has been fully implemented by the first reporting cycle without issues.
	7) Robotics		5) I'm an IFRS17 ambassador and actively trying to understand the new reporting requirements by mocking up new reporting requirements.
			6) All testing completed successfully.

- a) Robotic process automation developer and leverage automation technology to automate processes within department
- b) Hold discussions with Intelligent Automation CoE regarding robotic process automation projects and work with Intelligent Automation CoE to complete feasibility and prioritization studies for each project
- c) Develop a timeline for expected completion

7) All our robotic processes have been changed to work with the new SAP environment. Still need to move those processes to production.

Cheryl Makowski's Comments

Claus has made good progress in outlining the pros and cons of our future visualization tools. There was quite a bit of time spent this year on identifying the dashboarding solution and Claus was helpful along the way by having discussions with IT to better understand pros and cons as well as his own research on the topic. He also worked through identifying a POC for SAP Analytics Cloud and will be working with IT as these ideas materialize. Claus has a clear idea of what we are looking to achieve and the data elements required to get there so once we are in a live environment, he will be ready to start building within tool.

In addition, he has helped the team by building out tool within Excel that highlights outliers, such as the commission report. This will add value once it is utilized during the live close.

Claus does a great job in understanding the movements with respect to loss accounting and the new expense allocations. I appreciate the work he did to define and provide clarity around the expense allocations.

He also worked with the Life team and IT to implement a similar solution for the Life P&L reports and has been partnering up with their team for go-live and is assisting their team get back on track following a series of turnover.

Claus Hoerandner's Comments

- 1)

In the first half of the year I experimented with SAP Lumira (difficult to use) and PowerBI (no direct data connection) but each one does not fulfill our ask of a live investigative tool that can be used during the close. FAR has now picked the SAP Analytics Cloud and we are in the process of creating the proof of concept with IT's assistance. In the mean time I have enhanced our reporting capabilities through extensive use of the new SAP tools (analysis for office and excel), and enhanced report card which gives us the ability to run different cuts of the management view, as well as worked with Sam to develop a visual commission report. I am also assisting Life with their management reporting and hope they will be able to use the report by year end
- 2)

Account purpose is completed for my sections. In addition, I wrote a section on allocations to help our team understand the new allocation process.

Cheryl Makowski's Comments

Claus does a wonderful job each month being proactive in our monthly reporting and analysis deliverables. I appreciate his out of box thinking in how to make processes more simple and efficient and his willingness to share these new tools with the team. He single-handedly rebuilt our Report Car and LOB files in the new system which allowed us to reduce run times and create efficiencies. He has also performed many deep dives on the new allocation process which has allowed the organization to have insight into the issues and opens the opportunity for more prompt resolutions.

In addition, Claus does a great job each month with his analysis and questioning of anomalies. He has created a partnership with Actuarial and I can see they value the insight Claus provides each month.

Claus is frequently tapped on from areas of Finance for his help and expertise in reporting and technology. He brings a ton of value and is frequently receiving Spotlight recognition for all of his efforts.

Claus Hoerandner's Comments

- 1)
 - a) Accurate reporting achieved through H1 by employing the new SAP system
 - b) Accurate balance sheet reporting achieved through H1 by employing the new SAP system
 - c) All ad-hoc requests have been fulfilled in a timely manner which can be seen by the number of kudos cards received.
- 2)
 - a) & b) Taken on a bigger role in trying to make the close a smoother process. Once I discover an issue I take full ownership and work with the involved parties to resolve. This can be seen in the many allocation and DAC issues we have encountered that I have helped to resolve.
- 3)

We worked with Canada to fulfill their reporting requirements without having to do a stand-alone report. The CIID structure in 2020 will resolve the remaining issues for Canada.
- 4)
 - a-c) I have taken full ownership of the loss sections and have provided explanations for these reporting requirements.
 - d) I help with the Retail/Commercial P&L analysis when issues arise (OUE fluctuations / Paid ULAE issues / etc)
 - e) I helped develop the reporting solution for our yellow book analysis on both the premium and loss side.
 - f) I help other team members with their analysis. In addition, I have helped Ami/David with their request from Cindy Musielak to better understand the expenses (IFRS to STAT walk)

Overall Evaluation

Exceeded

Differentiation Level

Performance is on a continuum and not just in a few distinct boxes for differentiated guidance and recognition. Below you will see your differentiation level for this year

To understand this choice, find a high-level rationale below. You can discuss this during the year-end conversation. Use this as insight to enable future success.

Differentiation Level High

Rationale

Manager's overall comments

Claus had a fantastic year in 2019. He continuously went above and beyond as we navigated through a ton of ambiguity, not only in our team, but as an organization, and these efforts have allowed us to be successful in our deliverables. In addition to all the value he brought during the normal course of business activities, he also got involved in many more areas. He participated in the FLS - Innovation Expo for FAR and did a great job highlighting some of our team's initial wins with the new S4 system. He also leads up efforts for FAR Workplace and helps with the FAR townhall. Claus also took a lead role as an IFRS 17 ambassador and has been quickly learning what IFRS 17 means to the organization, what it means for FAR and for IR. He is true team player and continues to be valued member of IR and FAR. I look forward to Claus continuing to grow and develop as we head into 2020.

Strengths and Development Opportunities

Being aware of strengths and development opportunities is essential for our own and Zurich's overall success.

In this spirit, please highlight below your/your team member's personal strengths and potential development opportunities. You/your team member will be in a better position to achieve success by having a good view of both of these.

For a reminder on how we think about strengths and development opportunities, please click [here](#)

Note: Here you can access your previously entered [strengths](#) and [development opportunities](#) from your Individual Profile.

Analysis - being able to draw conclusions from large data sets

Key Strengths - Employee Self Reflection

Automation/Simplification - taking complex processes and making them simpler or re-thinking/challenging the current process

Key Strengths - Manager's comments

I agree. Claus has a knack for taking pieces of data or information and thinking about the meaning behind it, asking the right questions for to validate his understanding, and is able to propose new ways of thinking to approach a problem. He works well with other and is not afraid to dive right in to issues.

Leadership - being able to lead people and having them see the value of the work being done

Development Opportunities - Employee Self Reflection

Empowering co-workers/delegation - not doing all the work myself but trying to have co-workers help with doing the work

Development Opportunities - Manager's comments

Agreed. As Claus and I have discussed before, it would be great to give Claus some formal leadership responsibility. In addition, and what will be key for this role, is to learn how to delegate more. This will not only allow Claus better work balance of taking on too much, but will also will allow the team to grow more strongly as well which is a win-win.

Development Goals

Please take stock on the commitment you made for your development over the last year. You may have achieved some of your development goals or added new ones throughout the year.

Please use this space to reflect on those still open and how you can address them going forward. Are they still relevant, is something missing?
