

MyPerformance2020 - Claus Hoerandner

Overall Achievement and Impact

While achieving goals is an essential part of delivering, overall performance is more holistic. Take this opportunity to highlight key professional achievements and accomplishments throughout the year. Consider the impact on the business (results) and how this was delivered (behaviors).

Note: As soon as you save something here it will be visible to everyone who has access to the form

Employee's overall comments

I think 2020 has been a successful year. Even though I learned I am more effective in face to face meetings we have continued virtually and been able to deliver the close without major hiccups. I have made strides in continued automation, delivered IFRS4 and IFRS17 parallel reporting, and went live on some key projects (LL/CAT, Clearinghouse, Insurance type). The IFRS17 light parallel run was delivered and it showed us where we need to continue our work to refine the IFRS17 reporting. I have tried to collaborate inside and outside our team as much as possible and even engaged with our European counterparts to resolve issues (IFRS17 and Insurance type).

I have tried to empower and teach my co-workers and I am starting to see the benefit in other people running reports and doing the automation work. In the future I'd like to continue this rather than do all the work myself as it will help me grow as an individual and grows the strength of the team.

Manager's overall comments

Claus had a great year and continued to deliver value to the organization through his work in reporting automation and project work. Not only does he drive forward the organization with his technical capabilities, he has been also focusing on training and developing colleagues through knowledge sharing and cross training. Claus delivered on many projects throughout the year, most notably IFRS 17 which has been instrumental in driving our team forward and well positioning us for the next phase of IFRS 17 reporting and deliverables. I look forward to seeing Claus grow even more in the year to come as he further develops and expands on his leadership capabilities through his work with the team and across FAR.

Comments Throughout the Year

Continuous Conversations matter – you can find comments and reflections from throughout the year, below. This will ensure a common understanding of achievements and challenges, which will both improve performance and inform the Year-end Review.

Employee's overall comments

Operational Excellence/Projects

Successfully uploaded plan and prior year data into S4. Also created the IFRS17 P&L that has been published monthly and in sync with the IFRS4 P&L. More enhancements to come. Tested Clearinghouse multiple times (with help of RPA) and moved to production. Brought Insurance type into production and resolved the Data Quality Dashboard discrepancy – further alignment to come.

Large Loss and CAT went live this year and I developed a new report that helps actuarial align with the Report Card bookings. In addition, I facilitated the IFRS17 Insightz light parallel load along with all its sub functions (Addback units, Tax, Insightz/FIP/Report Card tie outs, mapping Report card to Insightz, various alignment issues, analysis of the Management pack, and discussions with FIP team on data issues).

Financial Execution: Through the delivery of Core FAR functional Services

Successfully managed the day to day close without missing any close deadlines that were within our control. Resolved multiple allocations issues and helped the team analyze and resolve issues during the close. Helped explain and highlight monthly fluctuations by making our reports more robust and insightful (new format on report card and various other reports) as well as developing the BOP walk which has become the main discussion point of the close meetings. I also lead the monthly review of Paid ULAE, Direct OUE, Allocated OUE to catch any obvious errors during the close.

Customer/Analysis

Made major strides in the BU/LE space by building out Report Card, LOB P&L, NAIC LOB P&L, Balance sheet flux (using ZCORE logic), trial balance, and Ledger Comparison reports for every company and RU including Canada and Clearinghouse. In addition, developed the robot to refresh these reports which freed up time for our analysts to concentrate on the analysis and not spend time on the mechanics of the reports. Lastly, I was involved in the FLS earlier this year to present on the topic of Report Simplification and Innovation which was well received. I also presented to the FLT on our Data Quality dashboard and actions to resolve our discrepancies.

Manager's overall comments

Please see comments below in "Goals" section.

Performance Goals

Please reflect on the achievements for each goal. Provide an assessment for each goal, as well as comments and rationale to support how you've evaluated each individual goal. Consider both what as well as how these results were achieved.

Assess against the three performance categories: Partially Met, Fully Met and Exceeded

Cheryl Makowski's Comments

Claus has delivered enhanced BU/LE reporting capabilities throughout 2020 by developing and delivering a new set of standard

reports that support the BU/LE analysis process. The legal entity focused reports provide visibility and trending by BU/SBU and for various cuts of data such as P&L, Balance Sheet, LOB, etc. In addition, these reports have been automated through robotics and provide 2x per day scheduled updates as well as the ability for users to refresh data on demand. This work adds tremendous value as it gives the organization much needed insight into the stand alone legal entities to ensure the results are complete and accurate. These reports have made the BU/LE team successful in identifying anomalies for research prompting either resolution or validation of a new accounting transaction. In addition, the new balance sheet report and trend is presented in a true “FIP” view allowing our team to have better insight into the rolled up FIP result ahead of official submission. Finally, Claus was involved with the 2020 FLS Summit where not only did he help facilitate the “reporting simplification” segment by showcasing reporting tools, he also stepped in for a colleague to help facilitate and present IFRS 17 topics at the 2020 Innovation Expo.

Claus Hoerandner's Comments

Made major strides in the BU/LE space by building out Report Card, LOB P&L, NAIC LOB P&L, Balance sheet flux (using ZCORE logic), trial balance, and Ledger Comparison reports for every company and RU including Canada and Clearinghouse. In addition, developed the robot to refresh these reports which freed up time for our analysts to concentrate on the analysis and not spend time on the mechanics of the reports. Lastly, I was involved in the FLS earlier this year to present on the topic of Report Simplification and Innovation which was well received. I also collaborated with Andrew Dryden to present the IFRS17 project at the Innovation Expo. Lastly, I presented to the FLT on our Data Quality dashboard and actions to resolve our discrepancies – especially on the reconciliation of the CPR insurance type.

I also helped the Close Ops team develop their robot that will help them catch allocation errors on a daily basis without having to rely on us to catch them.

Achievements

Cheryl Makowski's Comments

Claus has delivered on Financial Execution through the numerous reporting requirements required by our team each month. He ensures all reporting deliverables are both timely and accurate for our P&L "Report Card" and LOB reports for both IFRS 4 & 17. He raises anomalies to appropriate departments and brings transparency that "highlights" the underlying issues/concerns which leads to prompt resolution, better education and healthy discussion on what the underlying business activities are taking place (for example, expense allocations, retro reserves/payments, etc). He delivered a new report card view in 2020 which allows for better insights and trending of the financial result. We have received very positive feedback from these reporting changes/updates. Also, Claus has collaborated efforts with Close Ops, Reinsurance and PEM to reconcile and resolve the Insurance Type differences leading to a positive score on Group's Quality Dashboard. Claus also works closely with other teams providing assistance and guidance to Hana reporting and creating ad hoc reports as needed. He has ensured our reporting cuts are automated allowing for more time to be spent analyzing the results. He greatly assists in the monthly accounting close by raising issues and working towards resolution. He is very effective as a communicator and has developed a great rapport with many colleagues.

Claus Hoerandner's Comments

Successfully managed the day to day close without missing any close deadlines that were within our control. Resolved multiple allocations issues and helped the team analyze and resolve issues during the close. Helped explain and highlight monthly fluctuations by making our reports more robust and insightful as well as developing the BOP walk which has become the main discussion point of the close meetings. I also lead the monthly review of Paid ULAE, Direct OUE, Allocated OUE to catch any obvious errors during the close.

In 2020 I developed a new report card view/format that simplifies the financial views, gives trending, and draws out outliers. In addition, I ran the close processes concurrently for IFRS4 and IFRS17 which led us to improve the IFRS17 reporting. All these processes have then been automated through robotics which lets me and the rest of the team spend time on the analysis rather than the creation of the reports.

Cheryl Makowski's Comments

Claus has delivered on Operational Excellence and Projects during 2020 by following: All reports were restated accurately and timely for the 2020 CIID changes, incorporating the 2020 Plan and the changes implemented for the CAT/Large Loss project go live. These reporting changes were significant in 2020 given the magnitude of the CIID changes as well as incorporating the new report card views/trends. Claus has also been playing a major role in the IFRS 17 project by producing monthly P&L reports, making changes as needed due to project scope changes, and working back with other teams (e.g. PEM, Actuarial, and IFRS 17 project team) to ensure alignment from their perspectives. He also played a significant role ensuring the Q2 2020 LPR was successful for ZNA. He worked with the IR team to ensure the InsightZ loading file was accurate pre-submission and also worked to identify the outliers post FIP consolidation. This exercise helped bring awareness and highlight the accuracy of ZNA's result and the items requiring attention. Claus also worked on the Clearinghouse activities by building out our financial results to incorporate the Clearinghouse companies and testing our processes for completeness and accuracy. Finally, Claus has been taking the lead on ensuring our Insurance Type results are complete and accurate by reconciling data between SAP, Reinsurance, and InsightZ. He has raised issues and worked across teams within the US, Canada and Switzerland to ensure alignment. This work has lead to a successful "pass" in the Q2 and Q3 2020 Group Quality Dashboard metric for "CPR" data.

Claus Hoerandner's Comments

Successfully uploaded plan and prior year data into S4. Also created the IFRS17 P&L that has been published monthly and in sync with the IFRS4 P&L. More enhancements to come. Tested Clearinghouse multiple times (with help of RPA) and moved to production. Brought Insurance type into production and resolved the Data Quality Dashboard discrepancy – continue to refine the alignment. Large Loss and CAT went live this year and I developed a new report that helps actuarial align with the Report Card bookings. In addition, I facilitated the IFRS17 Insightz light parallel load along with all its subfunctions (Addback units, Tax, Insightz/FIP/Report Card tie outs, mapping Report card to Insightz, various alignment issues, analysis of the Management pack, and

discussions with FIP team on data issues). The IFRS17 Light parallel run gave us a lot of insight into issues that need to be resolved in 2021 and I am in the process of engaging the various departments so these issues can be tackled.

Clearinghouse created some close issues that delayed feeds or entries going into the system but we have been able to make up those delays and never missed a close deadline. Still in the process of refining the elimination process for Clearinghouse. Once we have these issues resolved I would like to use the same process to expand the elimination process to the rest of the P&L where we can then deliver proper Gross/Net reporting for IFRS17.

Cheryl Makowski's Comments

Claus has been developing new skills throughout 2020 through his involvement with various project work which has required him to not only learn new content (e.g. InsightZ, Reinsurance/Insurance Types, IFRS 17, etc) but also how deliver this content in a meaningful way to colleagues to help with their learning and understanding. Claus is always willing to help out others but he has also challenged himself to “teach” others how to do what he does (for example, enhanced reporting through robotics, etc). He is starting to see some of this work pay off as other’s on the team are now taking the initiative to create new reports and identify solutions first before looking for guidance and support. In addition, Claus continues to develop his technical capabilities and has become Alteryx certified during Q4 2020. These efforts will help Claus be successful in mentoring our FDP during 1H 2021.

Claus Hoerandner's Comments

In 2020 I was able to enhance my automation and simplification skills by automating more and more tasks from our close and expanding the reporting on the BU/LE side. My big goal for the year was to start transferring some of this knowledge to other members of our team to avoid any Key Man Dependencies. We have seen tremendous growth in Sam’s skill in report building and robotics and he has started taking the lead on some of these projects. This has been one of the accomplishments I have been most proud of this year as delegation and empowering my coworkers is one the skills, I have been actively working on improving. I hope to continue this work with Grace as I have her take on some of the report building in the IFRS17 space in 2021.

I have also tried to become more pro-active rather than reactive. Whenever I see an issue I try to meet and discuss them before they become real issues. Sometimes this works out – other times this requires a little more development on my part in the coming year.

Overall Evaluation

Exceeded

Differentiation Level Medium

As you select the right level, please provide a short and compelling rationale for your choice that will also be shared with your team member.

Manager's overall comments

Claus had a great year and continued to deliver value to the organization through his work in reporting automation and project work. Not only does he drive forward the organization with his technical capabilities, he has been also focusing on training and developing colleagues through knowledge sharing and cross training. Claus delivered on many projects throughout the year, most notably IFRS 17 which has been instrumental in driving our team forward and well positioning us for the next phase of IFRS 17 reporting and deliverables.

Strengths and Development Opportunities

Being aware of strengths and development opportunities is essential for our own and Zurich’s overall success.

In this spirit, please highlight your personal strengths and potential development opportunities, below. You will be in a better position to achieve success by having a good view of both.

For a reminder on how we think about strengths and development opportunities, please click [here](#)

Note: The strengths and development opportunities entered will feed into the Individual Profile and your IDP. Here, you can access previously entered strengths and development opportunities so you can build on this:

- [Key Strengths](#)
- [Key Development Opportunities](#)

Automation and Simplification

Key Strengths - Employee Self Reflection	Getting stakeholder together to resolve issues
	Breaking issues into small and easier to understand pieces
Key Strengths - Manager's comments	I agree with Claus' comments. Claus does a good job collaborating with others on various issues and topics. He has great technical abilities. He drives automation and simplified processes. Empowering co-workers
Key Development Opportunities - Employee Self Reflection	Delegation - don't do all the work myself
	Teaching coworkers - automation, report building, analysis
Key Development Opportunities - Manager's comments	I agree with Claus' comments. These key areas will not only help Claus in his leadership development, it will also make the Zurich team that much stronger.

Development Goals

Please take stock on the commitment you made for your development over the past year. You may have achieved some of your development goals or added new ones throughout the year.

Please use this space to reflect on those still open and how you can address them going forward. Are they still relevant, is something missing?

For a reminder on how we think about development planning click [here](#)

Note: Your development goals, below, are only visible to your manager as part of your Year-end Conversation – it will not be part of or influence the evaluation.
