Overall Achievement and Impact

Please take this opportunity to celebrate personal achievements and accomplishments for the year. What stands out? Consider both the impact on the business (results) and how this was delivered (behaviors).

Employee's overall comments

2023 has been a successful year for me and my team. We have made significant progress on helping the Life team with reporting – automating the Management reporting, BU/LE Life fluxes, and waiver automation. In addition, the Data Quality scores have remained high showing the EPM submission quality. I am most proud of implementing a FAR Innovation Log to generate simplification and automation ideas across all FAR teams. The log creates accountability for these ideas to be implemented and prioritizes them based on expected impact. It also lets us connect the innovation idea with an appropriate automation specialist who can implement the idea as efficiently as possible. To date, the log generated 80 ideas of which 20 have been successfully implemented. I have also shown to be a strong FAR leader by presenting/leading the FAR meetings multiple times, leading the FAR social committee, and trying to be a change agent for FAR. The automation of the close decks/reports have also helped us spend more time on analysis and finding errors rather than creating reports. My team and I excel in helping different teams across FAR with their reporting issues and are often tapped on when issues arise. I would like to continue this trajectory through 2024 to implement further automation and efficiencies within the organization and strengthen our collective technical skillset.

Rita Falco Matrix Manager overall comments

Claus has had another successful year in FAR. I cannot say enough positive things about having Claus on the team. He is an absolute pleasure to work with. Claus is a clear leader, not only within my team but the broader FAR and F&A organization. He is well liked and respected across all of F&A. Not only is Claus exceptional in his work product, but he is also exceptional in 'how' he delivers and supports across the team.

Claus has truly embraced the 'one Financial Reporting team' concept. We are no longer internal, external, Life, etc., reporting. We are ONE team. Claus was a key contributor and driver of many successes this year, including:

- New IFRS 17 reporting, including automated monthly decks to help review and discuss results with senior leadership
- New Life reporting, including management P&L's, flux/trend analyses and quarterly decks for review and discussion with leadership
- Continued improvement of the automated elimination process (and alignment with Group process)

While the above may look like three little bullets, this entailed an extraordinary amount of work. One of Claus' greatest strengths is his ability to adapt and respond to feedback/requests timely. This was especially evident this year as there have been numerous requests to update reporting and presentation of information within the close deck as we all better learn IFRS 17 and what is needed to best tell the story each month. Claus has been able to respond to these requests at lightning speed. I honestly do not understand how he can be so fast at times! I'll even specifically say an update can be made for next month, and it will be updated in the current month deck in less than an hour!

Claus is an exceptional leader. Effective 2024, Claus will be a direct report to Bob Daniel and matrix into me. As discussed with Claus, I do not see this significantly changing our day to day interactions. I'll continue to meet with Claus 1:1 weekly. However, Bob and I thought this was important as it will give Claus different exposure and interaction with Bob's leadership team. Claus is already acting in this capacity and this just puts some formality to it.

Claus leads by example. I love hearing about the fun outings he plans for his team and how he celebrates birthdays, anniversaries, and other events. I truly think it's 'little things' like this that make a big impact. It is evident that Claus cares about individuals beyond work. He shows interest in each team member's growth, development and personal well-being.

Employee's overall comments

The first half of the year has been successful so far. I have made progress on automation, continuing to leverage the tools we have to simplify or enhance our reporting (Life reporting, Alteryx usage, eliminations). I have also started an automation log that will help us pinpoint further opportunities within FAR. My team continuously delivers high quality reporting and decks to facilitate the monthly closes and have meaningful discussions with our CFO. We have also met all group reporting deadlines without major issues and we continue to align local and group reporting. I'm also proud of my leadership development as my feedback score continue to improve, lead a well performing team, and try to drive more engagement across FAR.

I whole heartedly agree with Claus. As mentioned above as well, the Life reporting improvements have been significant. In addition, as previously discussed, another example of Claus' leadership within FAR is his work on the Innovation Log. He does a great job motivating individuals to find more automation and efficiencies in a very collaborative way. He is not condescending or judgmental of

how a process currently works or was initially established. Rather, he provides healthy challenges, suggestions for more efficiency, and then offers his support. Claus makes FAR a great team!

Claus is an exceptional manager and leader. This is evident in his manager feedback survey results. In addition to the manager feedback survey results, I see Claus being an exceptional manager almost every day. Claus makes himself available and he is responsive to his team (and others across the organization). As mentioned above, Claus celebrates milestones and anniversaries with his team. He also plans team outings to build team camaraderie. As discussed, Claus is a leader across FAR. He leads the FAR social committee and ensures there are fun things planned throughout the year. He also helps rally the team to support in various fundraising or community events during the year. These are the types of things that make Claus exceptional. He is innately a thoughtful, caring, and dedicated person.

Claus also supports the growth and development of his team. He participates in exercises with his team to help them understand their strengths and weaknesses. This also helps his team members think about what they want next from their careers.
